

Description

Over the course of this 5-day on-site train-the-trainer workshop, a SIOP® Certified Consultant will provide guidance in order to build capacity among district and/or school staff to deliver effective SIOP® Model professional learning. Participants gain an in-depth understanding of the components of the SIOP® Model and techniques in order to teach others to implement SIOP® in their lessons. Using the bestselling, research-based book *Making Content Comprehensible for English Learners: The SIOP® Model 5th edition*, participants gain practical skills to collaborate, share, and implement lesson plans that incorporate all eight components and thirty features of SIOP® in order to teach content while developing students' academic and social language. This capacity-building training also prepares participants to be able to communicate the importance of sheltered instruction and the benefits of the SIOP® Model for all students, including English learners.

Session Outcomes

By the end of the session, participants will be able to:

- Identify the components and features of the SIOP® Model in classroom instruction
- Build a lesson using the SIOP® Model features and components
- Observe and assess the implementation of each of the eight components
- Introduce key SIOP® concepts to others
- Plan and deliver effective, foundational SIOP® professional learning in their schools or districts
